

# Using Ultimate Pen

Ultimate Pen is software that allows you to highlight or edit over your existing applications on your computer screen. You can access Ultimate Pen in your Applications folder on the hard drive of your computer which is connected to the TV. You can also start Ultimate Pen using hot keys. (See below.)

## Hot Keys

**apple + control + D** Holding down the apple and control and D keys turns Ultimate Pen on or off.

**apple + T** Shows or hides Tools palette.

**apple + H** Hides Ultimate Pen.

## Tools Palette

Clicking a symbol in the Tools palette activates that tool.

**Pen Tool**

**Eraser Tool**

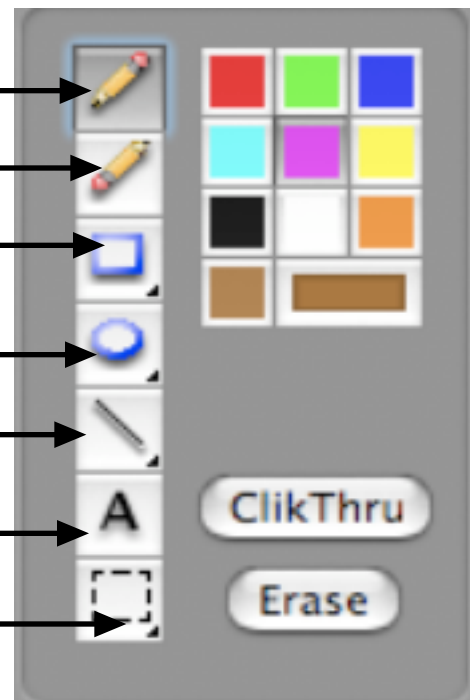

**Rectangle Tool**

**Oval Tool**

**Line Tool**

**Text Tool**

**Selection Tool**

## Tool Tips

If you hold down the **Shift** key with the **Rectangle Tool**, you will make a perfect square. If you hold down the **Shift** key with the **Oval Tool**, you will get a perfect circle. Holding down the **Option** key with either shape tool will give you a filled-in shape rather than just the shape's outline.

Holding down the **Shift** key with the **Line Tool** allows you to draw horizontal, vertical, or 45 degree angle lines. Holding down the **Option** key will place an arrow on the end of the line.

You can type with the keyboard atop of your other applications using the **Text Tool**. You can change the font and size of the text using the Preferences window. (Press **Esc** when you finish typing in one section and want to type elsewhere on the application.)

Ultimate Pen is like a window on top of your applications below. **Click Thru** allows you to access the other applications underneath. The easiest way to get back to using Ultimate Pen is to use the hot keys **apple + control + D**

The **Erase** button will completely erase all drawing.
